

Is architectural
aluminium
your business?

Then as specialists in powder coating architectural aluminium, we'd like to talk to you.

We are Approved Applicators of Dupont, IGP, Interpon, Inver, Syntha Pulvin, and Tiger powders.

Our chromate pretreatment process allows us to guarantee all work, typically for 25-30 years.

Two automatic paint lines allow us to be flexible in our response.

We have experience of all major systems including Comar, Kawneer, Kestrel, Metal Technology, Sapa, Schüco, Senior Aluminium, Smart Systems, Technal, and Universal.

Unlike many of our competitors, we're equally comfortable coating flashings, sheet, and panels.

Our fleet of vehicles serves an area from central Scotland right down to Leicestershire.

And our philosophy is simple: it's all about service.

So why not give us a call?

Because, after all, your business is our business.
